

Britain 2010s - Common Purpose corruption and communitarianism

We are living at a particularly momentous time in history.

In order to understand what is happening in Britain in the 2010s, you first need to know about four things:

1. the New World Order;
2. the United Nations Agenda 21 Sustainable Development Plan;
3. a political philosophy called 'communitarianism';
4. a fake charity named Common Purpose.

These four things are linked together.

1. The New World Order

This project has been in the works for decades. Its main objectives are:

- 1.1 The creation of a One World Government with a unified monetary system under their direction;
- 1.2 To bring about the utter destruction of all national identity and national pride;
- 1.3 To bring about the end to all industrialization in what they call 'the post-industrial zero-growth society'.

2. The United Nations Agenda 21 Sustainable Development Plan

This is the name of the programme for the destruction of Western industrial civilization. Agenda 21 is the 'smoking gun' for the New World Order. Adopted by all member nations in 1992, this is the model for redesigning a communitarian world. If you're like a lot of people who sense something is very wrong, if you're looking for concrete, irrefutable evidence for the New World Order in your neighbourhood, ask your local officials about sustainable development.

Whatever you call it: Agenda 21, Sustainable Development, Smart Growth, the goals are the same, to reduce and eventually eliminate private property ownership and rights.

3. Communitarianism

Communitarianism, the philosophy underpinning the NWO and its agenda, has been implemented by stealth in Britain over the past few years. For example, the smoking ban is a typical communitarian policy.

Communitarianism is difficult to pin down. It is...

- 3.1 a strange mixture of capitalism and communism. Communitarians want social control in a collectivist and corporatist society;
- 3.2. a type of neo-communism that owes some of its ideas to Gramsci and the Fabians;
- 3.3. a 'Big Brother knows best' type of philosophy.

Communitarians want...

- 3.4. to create a post-modern, post-democratic feudal society known as the 'New World Order' run by a small number of rich and powerful people with everyone else working as peasants. In order to achieve their objectives they must destroy the middle class and the nation state;
- 3.5. group rights dominant over individual rights;

3.6. highly-taxed capitalism merged with social collectivism, administered through QUANGOs and fake charities. They call this 'civil society'.

The communitarians, through stealth, perseverance, duplicity, and subversion, have snatched individual-rights based democracy right out from under our noses, and replaced it with group-rights based communitarianism - a trendy, innovative, and newish form of communism administered by foreign elitists.

They are convinced that a communitarian system is 'better' for society - 'improved social cohesion' is the central tenet of their political ideology.

Obama, Blair, Brown and Mandelson et al are Fabian communitarians and Cameron and Clegg show distinct communitarian tendencies, although you will not have heard them use the term. The truth of their hidden agenda is now known and we know their real intentions. These people are front-men for the New World Order communitarians.

Communitarian policy has been seen as fascist corporatism with the primary difference that instead of focussing on nation states, own country and people, it propagates a supranational policy. A secondary difference is it influences by means of informal social structures, like for example Common Purpose, instead of by institutionalised State violence - at least for the time being.

Communitarianism is aimed just like fascists, socialists and communists at the collective. The interests of the collective always prevail above the interests of the individual. Individuals must subjugate themselves to the 'common good'. Communitarians create imaginary problems such as global warming, terrorism suppression and the bank crisis to force through their ideas.

4. Common Purpose

Common Purpose is a fraudulent 'educational charity' acting as a change agent being used to recruit and train the commissars and apparatchiks needed to implement this hidden communitarian agenda.

The objective of the hidden agenda is the creation of a communitarian society controlled by the NWO European Union collective.

In order to achieve this objective, the UK government has been running a parallel administration made up of QUANGOs and fake charities. A fake charity is legally a charity but effectively operates as a government department, receiving a substantial amount of funding directly or indirectly from government and operating as a government department.

Whilst carrying out the hidden United Nations agenda, Common Purpose has corruptly abused millions of pounds of taxpayers' money.

Common Purpose is guilty of defrauding YOU of YOUR money.

5. What YOU can do!

Ask questions. Ask about Common Purpose. Find out what your council is doing about sustainable development. Put in Freedom of Information requests - you can do this free online at whatdotheyknow.com.
